```
"message": {
  "role": "assistant",
  "content": "Bonjour, bon matin.",
  "reasoning": "The user says: \"Hello Good Morning .Transalte in french\". We need to act as
a Language Translator translating the user instructions in specified language. The user
is asking to translate something in French? They said \"Hello Good Morning .Transalte
in french\". Likely they want to translate \"Hello Good Morning\" into French. The
instruction says: Act as a Language Translator translating the user instructions in
specified language. So the user wants the translation of that phrase into French.
\\n\\nThus answer: \"Bonjour, bon matin.\" Actually \"Good Moirning\" in French is
\"Bonjour\" or \"Bon matin\" (less common). Probably \"Bonjour, bon matin.\" But more
common: \"Bonjour\". If they want \"Hello Good Morning\" in French: \"Bonjour, bon
matin.\" Let's produce that."
```
