

Prompton

1. Search Functionality

Weak Prompt:

The screenshot shows a ChatGPT chat window with a prompt for testing search functionality. The prompt is titled "Scenario 01" and includes a search icon, the text "Search Functionality", and a placeholder "X". Below this, it says "Test the search feature." and "What's missing". The "What's missing" section lists: "No product type (e-commerce, hospital), no filter/sort behavior, no empty/invalid input scenarios, no performance angle."

Scenario 01 — Improved Search Functionality
Context: E-commerce application

Test Objective: Verify that the product search functionality works correctly across valid, invalid, empty, and filtered searches.

TC ID	Scenario	Expected Result
TC-01	Search using a valid product name, e.g., "Laptop"	Relevant laptops are displayed.
TC-02	Search using partial keyword, e.g., "lap"	Products matching the keyword are displayed.
TC-03	Search using invalid/non-existing product,	"No products found" message is displayed.

At the bottom of the chat window, there is a text input field with the text "Hi," and a "Think" button.

Strong Prompt using ICEPOT

E-Commerce Search Functionality — Test Cases

TC ID	Priority	Description	Precondition	Steps	Expected / Actual Result
TC001	P0	Verify search returns relevant products for a valid product keyword	E-commerce application is available; matching products exist	1. Open application 2. Navigate to Search 3. Enter Laptop 4. Click Search	Expected: Relevant laptop products are displayed with name and price. Actual: To be captured during execution.
TC002	P1	Verify search returns no results for a product that does not exist	Application is available	1. Open Search 2. Enter XYZNonExisting999 3. Click Search	Expected: A clear "No products found" message is shown. Actual: To be captured during execution.
TC003	P1	Verify search works with a partial product name	Application is available; products matching the partial keyword exist	1. Open Search 2. Enter lph 3. Click Search	Expected: Products matching the partial keyword are displayed. Actual: To be captured during execution.
TC004	P2	Verify search handles blank input	Application is available	1. Open Search 2. Leave search field blank 3. Click Search	Expected: Validation message is displayed and application should not return an unintended result. Actual: To be captured during execution.
TC005	P2	Verify search handles special-character input	Application is available	1. Open Search 2. Enter @### 3. Click Search	Expected: Application handles the input gracefully with appropriate no-results/validation message. Actual: To be captured during execution.

A screenshot of a web browser displaying a ChatGPT chat session. The browser's address bar shows the URL 'https://chatgpt.com/c/6aabca25-95a0-83e8-a91c-9a62d52913d4'. The chat interface has a light blue header with a 'Share' button. The main content area shows a 'Review Summary — Team Lead' section with a bulleted list of five items: Coverage, Priority, Test data, Clarity, and Recommendation. Below this is a 'Team Lead Comments' section with a numbered list of five comments (TC001 to TC005). At the bottom, there is a text input field with the prompt 'Convert whole chat to downloadable xlsx format including prompt' and a 'Send' button. The browser's taskbar at the bottom shows various application icons and the system clock indicating 4:42 PM on 9/17/2023.
