Home Assignment:

1. Add Resume folder to the workspace.

2. Write the prompt to insert all the resumes in MongoDB batch wise.

   PROMPT:

   Refer the existing architecture which was implemented phase by phase until Phase 16. Created a new folder Resumes and which had 160+ list of resumes

   I need to execute the ingestion process workflow using batch execution

   [STRICT] DO NOT PROCEED with live implementation until I APPROVE

   [STRICT] Configure the workflow to process resumes in batches of 5 or 10 files per run.

3. All resumes ingested in DB.

Copilot · Batch ingestion workflow for resumes
run next batch
run next batch
Completed 5 steps in 24s
The next batch of 10 completed: 9 succeeded and 1 failed with RESUME_EXTRACTION_FAILED (HTTP 422). The checkpoint now records 158 successes and 12 failures. No further batch was started.
run next batch
Completed 6 steps in 22s
The batch of 10 completed: 9 succeeded and 1 failed with RESUME_EXTRACTION_FAILED (HTTP 422). The ledger now covers all 180 PDFs: 167 succeeded, 13 failed. No unprocessed PDFs remain for a normal batch run. Failed files require review before using the explicit retry option.
